

BOPOS CAROUSEL

The Vidir BOPOS Carousel is an automated storage and retrieval system that provides a technical and efficient back end solution to your growing online sales platform. The system tracks and manages every package placed inside the carousel for quick and easy retrieval. By utilizing AS/RS technology, the system can scale and utilize overhead space providing a high density locker system with a superior customer experience.

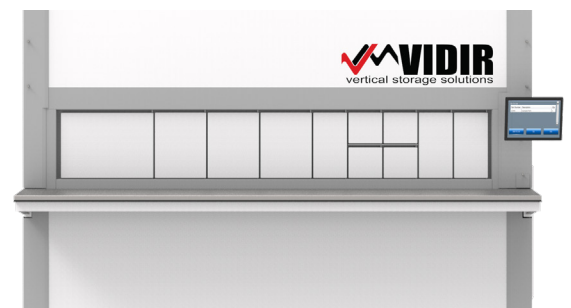

There are 2 applications for the BOPOS Carousel: Customer Access, and Employee Access.

- **Improved Customer Service experience**
- **Creates flexible pick up options for convenience of customer**
- **Boosts store foot traffic and ancillary sales**
- **Avoids shipping fees for customers, missed deliveries and stolen packages**
- **Available options for height and width, multiple locker arrangements, and flexible carrier configurations for large or small items**
- **Utilizes overhead space to increase revenue per ft²**
- **Improved security with optional gates, password protection, and access logs**

CUSTOMER ACCESS

A “hands-off” approach to delivering customers’ online orders. Once stocked, customers are able to drop by the store at a time that is convenient for them, to pick up their items without requiring assistance from an employee. They simply scan their order barcode into the interface, the carousel will rotate to the correct location, and a pick light will guide them to the locker that holds their items.

Safe Handling • Easy Access • Maximum Storage • Fast Retrieval • Small Footprint

BOPOS CAROUSEL

CUSTOMER SATISFACTION

Whichever application is chosen, customers will be very satisfied with the quick and simple online order pickup option available to them. Orders will be organized, easily accessible, and documented to smooth out the pickup process.

Combine with a *Vidir Cartlift* for flat cart storage of larger items ordered for pickup.

- Improved Customer Service experience
- Creates flexible pick up options for convenience of customer
- Boosts store foot traffic and ancillary sales
- Avoids shipping fees for customers, missed deliveries and stolen packages
- Available options for height and width, multiple locker arrangements, and flexible carrier configurations for large or small items
- Utilizes overhead space to increase revenue per ft²
- Improved security with optional gates, password protection, and access logs

EMPLOYEE ACCESS

Retains the “personal touch” aspect of online order pickup. Customers approach the Order Pickup counter, the employee scans their order barcode, the carousel rotates to the correct location, and a pick light will indicate which items belong to the customer.

Safe Handling • Easy Access • Maximum Storage • Fast Retrieval • Small Footprint
