VIDIR
vertical storage solutions

CARTLIFT

The Vidir Cartlift is a cart storage system which can accomodate flat carts for easy access and to provide efficient storage. The Cartlift can be incorporated with the Vidir BOPOS Carousel to provide storage for larger items for Buy Online, Pickup On Site programs.

THE NEED

Storage space restrictions make it difficult to set large items on flat carts aside, readily available for when customers arrive to pick them up. Oftentimes carts are left on the sales floor while waiting, obstructing customer movement and interfering with customers' shopping experience.
Vidir's Cartlift solves these problems with a simple, efficient solution.

HOW IT WORKS

- Multiple decks are nested into the base of the machine.
- Load carts onto the available deck, securing them into place with the locking mechanism.
- After the deck has been fully loaded with carts, one-touch controls elevate the deck allowing access to load another deck underneath with carts.
- Deck height is adjustable to allow for variable positions.
- Repeat the process as needed to store carts, elevating each deck when full.

- **Store up to 10 flat carts vertically in a footprint slightly larger than 2 carts**
- **Significant floor space savings - 125ft^2 of storage in a 40.25ft^2 footprint (67% savings!)**
- **Height (up to 32'), Depth, Width all adjustable to fit storage needs**
- **Centralizes, secures and protects carts**
- **Reduces Health and Safety Hazards from 'clutter'**
- **Semi-automatic system Lowers and raises carts at the push of a button**
- **Utilizes overhead space to increase revenue per ft^2**

Safe Handling • Easy Access • Maximum Storage • Fast Retrieval • Small Footprint
